

Research Notes

Chapter 1: Overview

This is the first paragraph of the overview with enough text to act as a real block of body content used for testing the chunker and citations.

Part of the methodology relied on careful sampling, and this sentence is a normal paragraph that must not become a heading even though it starts with the word Part.

Chapter 3 covered how the earlier sections connect, but this is body text and must remain a paragraph rather than a heading.

A short closing line.
